In-Building RF Coverage (DAS)

Offering a vast range of wireless broadband and radio frequency expertise and information technology solutions, Arcticom provides reliable fiber and Ethernet Distributed Antenna Systems (DAS) for public safety, First Responders, Government and DoD military facilities including systems design, engineering, RF analysis and turnkey installation services. These system meet the NFPA & IFC Compliant Public Safety Mission Critical RF Communications criteria.

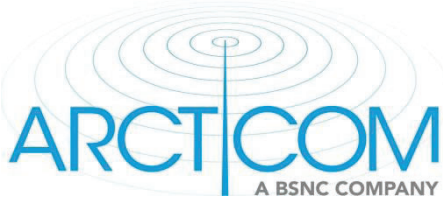

Whether for industrial wireless or public safety radio traditional tower solutions for providing coverage and capacity only deliver so far. Bringing those signals inside buildings or simply adding densification of the RF signals many times requires Distributed Antenna System (DAS) networks consisting of Fiber/Ethernet DAS products, repeaters/signal boosters, as well as couplers, splitters, and antennas. Our current blend of products can support wireless voice and data services public safety communications FM, TETRA, Project 25 (P25) systems as well as other applications such as broadcast and (GSM, EDGE, UMTS, CDMA, LTE and 5G).

Arcticom has strong past performance in the design and deployment of DAS networks for many First Responders facilities, Healthcare and DoD military installations. See referenced projects below:
